Subject: Additional Vehicles 2.0L TDI GEN 1 and GEN 2

Good morning Byron and Mark –

The topic of “untouched” Gen1&2 vehicles for the agencies has been discussed. It was advised to me that 3.1.7 in the appendix requires that we deliver 2 vehicles of each generation to each of the agencies with the new field fix software. The legal interpretation is a requirement that we need to satisfy. It is of course our intent to give you the test properties that you require in order to approve various metrics.

Having said that, I received a request from Satya to deliver 2 additional “master series” GEN1 and 2 additional “master series” GEN2 vehicles to ARB.

Byron - Is this same request valid for EPA?

Mark & Byron –

Here is a list of available vehicles for VW to purchase (as of Dec 21). We need to act quickly as these are available for others to purchase.

If possible, please confirm the number of each Gen of master series vehicles and list your preference order of acquisition (first pick, second pick etc).
